Project Design Phase-II Solution Requirements (Functional & Non-functional)

Date	11 October 2022
Team ID	PNT2022TMID04403
Project Name	Visualizing and Predicting Heart Diseases with and Interactive Dashboard
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Enables user to make registration for the application through Gmail
FR-2	User Confirmation	Once after registration, the user will get confirmation via Email
FR-3	Visualizing Data	User can visualize the trends on the heart disease through Dashboard created using IBM Cognos Analytics
FR-4	Generating Report	User can view his/her health report and can make decisions accordingly

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

NFR No.	Non-Functional Requirement	Description
NFR-1	Usability	The application will have a simple and user-
		friendlygraphical interface. Users will be able
		to understand and use all the features of the
		application easily. Any action has to be
		performed with just a few clicks
NFR-2	Security	For security of the application the technique
		knownas database replication should be used
		so that all the important data should be kept safe.
		Incase of crash, the system should be able
		to backup and recover the data
NFR-3	Reliability	The application has to be consistent at every
		scenario and has to work without failure in
		anyenvironment
NFR-4	Performance	Performance of the application depends on the
		response time and the speed of the data
		submission. The response time of the application
		is direct and faster which depends on the
		efficiency of
NED #		implemented algorithm
NFR-5	Availability	The application has to be available 24 x 7 for users
MED (G - 1-1-124	without any interruption
NFR-6	Scalability	The application can withstand the increase in the
		no. of users and has to be able to develop
		higherversions
